

REMARKSI. The Advisory Action Mailed on February 18, 2004

Claims 1-2, 4, 10-11, 13, 15-16, 19-20, 22-24, 29 and 32-33 were rejected under 35 U.S.C. §102(e) as being anticipated by Cardillo, IV et al., U.S. Patent No. 5,937,041 ("CARDILLO"). Claims 3, 5-9, 12, 14, 17-18, 21, 25-28, 30-31 and 34-35 were rejected under 35 U.S.C. §103(a) as being unpatentable over CARDILLO.

In the above-referenced advisory action, the Examiner stated that the rejections were not overcome by Applicant's previous response because CARDILLO allegedly discloses a render system (see CARDILLO, 188, Fig. 3), which is located in the AIB and functions to format the HTML data file to be compatible with the display capabilities of the ADSI screen-display. The ADSI screen-display is physically separate from the AIB. CARDILLO, Figure 2.

The alleged render system in CARDILLO, which is referred to as the "transmitting section 188" inside the AIB, formats HTML data file into a format discernible by another machine (i.e., the ADSI screen-display). The ADSI screen-display then uses ADSI protocols to convert the data to human discernible format to be provided to a user. CARDILLO, col. 8, lines 61-65. See also:

Section 186 is connected to a data file formatting and transmitting section 188 that formats the HTML data file to be compatible with the display capabilities of screen-display 111. As explained in more detail below, this process could involve identifying particular sections of the data file for display, and eliminating, or truncating, those display lines that exceed the display capacity of screen-display 111. Preferably, the reformatting process involves using ADSI scripting techniques to configure the entire data file to a data display block specifically designed for the ADSI screen-

display, and compliant with the ADSI protocol requirements.

CARDILLO, col. 7, lines 15-26 (emphasis added).

In contrast, amended claim 1 recites a render system that is both (1) physically separate from the handheld device and (2) renders the retrieved web page in a human discernible format to a user. Independent claims 13, 29, and 32 have also been amended to include the similar limitation (i.e., human discernible format) as in claim 1. Based on the foregoing, Applicant respectfully submits that all pending claims are in condition for allowance.

II. Conclusion

Should the Examiner believe that a telephone interview would help advance the prosecution of this case, the Examiner is requested to contact the undersigned attorney.

Respectfully submitted,

By:
